Helena, MT 59601

#### 1. Overview

This document covers only the 2-D barcode on substitute form MW-3.

The 2-D barcode is intended to represent the information on the paper MW-3 form.

This version will comply with the computerized industry standards. If a software developer does not support 2-D barcodes, the area reserved for the barcode should be left blank.

A general rule that can be used to determine if a print is capable of producing a 2-D barcode is if the printer can reproduce a graphic such as an agency seal (on previous page) or business logo, then the printer should be capable of producing a 2-D barcode that can be scanned.

#### 2. General Standards

- The barcode will be a 2-D barcode in the PDF-417 format. The PDF 417 has error detection and correction capabilities. The error correction level should be set to level 4.
- All fields within the barcode are followed by a carriage return <cr>
- All fields are required, although a field can be left empty leaving just the field terminating <cr>
   Exception: Federal ID field may not be left empty
- All alpha characters should be in uppercase.
- Do not zero fill or fill with spaces if a field is to be left blank. If there is no data, a field should be left empty followed by a terminating <cr>
- EOD (End of Data): the final field in the data stream should be the characters \*EOD\* followed by a
- Stretching or scaling the barcode changes its integrity and reduces the readability of the barcode; it should not be done.
- Handwritten changes or modifications after printing the form and barcode is discouraged.
- Do not replicate the red text or box. This is 2D barcode reference numbers & indication where the 2D barcode should be placed on the form.

# 3. Approval Procedures

- The format of the Form and the 2-D barcode data will be approved separately and simultaneously, if possible to expedite the approval process. We will indicate exactly what is being approved.
- Test documents required are 1 full field sample & 5 variable data samples.
- 1-D barcodes are still required as shown on the form & explained in the Forms Specification document.
  - The 2D layer on the form document will show a 1D barcode that will indicate to our software that a 2D barcode is expected.
- All vendors must obtain 2D barcode approval from the Montana Dept of Revenue if they develop
  - Scannable tax forms containing 2D barcodes using its own software
  - Tax software that generates 2D barcodes to be used with in scannable forms developed by another company.

## 4. Duration of Approvals

- Approvals are valid for only one tax year (January through December)
- In general, each new filing season requires new approval, even if the official form does not change.
- Any questions about the bar-coded substitute form should be emailed to <u>DORe-Services@mt.gov</u> or contact Mary at 406-444-7372

# 5. Barcode Specifications

- The barcode is defined as a 2-D barcode in the PDF-417 format. The PDF 417 has error detection and correction capabilities. The error correction level should be set to level 4
- The Y/X ration will be 2.
- 2 inches high by 4 inches wide.
- The Mode setting will be ASCII to cover alphanumeric characters
- All fields within the barcode will use the carriage return <cr> as a field delimiter.
- All fields are required. If no data is provided, the barcode data for that filed will be blank followed by the <cr> delimiter. Exception: Mandatory data fields e.g. FEIN may not be left empty.
- EOD (End of Data): the final field in the data stream should be the characters \*EOD\* followed by a <cr>.
- Stretching or scaling the barcode changes its integrity and reduces the readability of the barcode; it should **not** be done.

#### 6. Rules

- Money fields must:
  - Contain only numbers
  - No punctuation
  - o Allow a negative sign in dollar amount fields. No other signs are allowed.
  - o Include both dollars and cents with the decimal point assumed (example: \$59.6 = 5960)
  - Do <u>not</u> round to the nearest dollar (example: \$5500.99 = 550099)

# 7. Field Types

Field Type	Data Limitations	Print Format	2-D Barcode Format
Text	<ul><li>All printable characters allowed</li><li>No leading or trailing blanks</li></ul>		
Amount	<ul> <li>Money fields</li> <li>Only characters 0-9 allowed</li> <li>Right justified (only valid in print format),</li> <li>no leading zeros</li> </ul>	999999999 99	9999999999
Numeric	Only characters 0-9 allowed		
Checkbox (CB)	<ul> <li>Mark field with an X if statement is true.</li> </ul>	Capital X = yes Blank = no	<ul><li>0 = no</li><li>1 = yes</li></ul>
Federal ID	<ul> <li>Only 0-9 characters allowed</li> <li>Must contain exactly nine characters</li> <li>May not be blank</li> </ul>	99 9999999	99999999
Account Id	<ul> <li>Must contain exactly 13 characters</li> <li>First 10 characters are always numeric &amp; last 3 are always alpha "WTH"</li> </ul>	9999999 999 WTH	999999999WTH
Dates	<ul><li>Format as MMDDYYYY</li><li>Must be a valid date</li></ul>	9999999	99999999
